

GitHub URL trick: the 3 links

Kisi bhi public GitHub repo ka URL lo, **github.com** ki jagah neeche wala domain likho. Bas. Example repo: `github.com/facebook/react`

1 · ARCHITECTURE DIAGRAM

gitdiagram.com

Link: <https://gitdiagram.com/facebook/react>

`github.com/OWNER/REPO` → `gitdiagram.com/OWNER/REPO`

- Poore codebase ka interactive architecture diagram, 20–30 seconds mein.
- **Enable zoom** se andar jao, **Export** se PNG ya Mermaid code download karo.
- Free for public repos. Private repo ke liye apna GitHub token lagana padta hai.

2 · AI-WRITTEN DOCS + Q&A

deepwiki.com

Link: <https://deepwiki.com/facebook/react>

github.com/OWNER/REPO → deepwiki.com/OWNER/REPO

- Repo ki poori documentation, AI (Devin) ki likhi hui, with links to the exact source files.
- Neeche **Ask Devin about ...** box mein sawaal poocho — jawab seconds mein, no login (Fast mode).
- Popular repos already indexed; nayi repo ke liye **Index your code** click karo (free for public repos).

3 · YOUR AI AGENT READS THE REAL REPO

gitmcp.io

Link: <https://gitmcp.io/facebook/react>

github.com/OWNER/REPO → gitmcp.io/OWNER/REPO (note: **.io**, not .com)

Ye ek **MCP server** hai us repo ke liye. Cursor / Claude Code / Windsurf / VS Code isse connect karke actual code padh ke jawab dete hain — guess nahi.

Cursor — ~/.cursor/mcp.json mein add karo:

```
{
  "mcpServers": {
    "react Docs": {
      "url": "https://gitmcp.io/facebook/react"
    }
  }
}
```

Claude Code — terminal mein:

```
claude mcp add --transport sse react-docs https://gitmcp.io/facebook/react
```

- Free, open source, no login. Public repos only.
- Page pe hi Cursor / Claude Desktop / Windsurf / VS Code / Cline ke ready-made config snippets hain.

CHEAT-SHEET

Ek nazar mein

WANT	REPLACE GITHUB WITH	EXAMPLE
Diagram	gitdiagram	gitdiagram.com/facebook/react
Docs + Q&A	deepwiki	deepwiki.com/facebook/react
MCP for your agent	gitmcp (.io)	gitmcp.io/facebook/react

Teeno public repos pe free, login nahi chahiye.

Verified 20 Sep 2026.

Bonus (same family): `gitingest.com/OWNER/REPO` — poori repo ek text file mein, kisi bhi LLM mein paste karne ke liye.
