

Photo asli ya AI? Google ka free CHECK

@shashikant.ai · comment CHECK guide · tested on 8 Oct 2026

1. Link

synthid.com

Google ka **SynthID Detector**: 7 Oct 2026 se sabke liye free (English). Login: Google, OpenAI ya Apple account.

2. Check kaise karein (3 step)

1. synthid.com kholo → sign in.
2. Photo, video ya audio upload karo.
3. 10–40 second "Detecting..." → result.

3. Result ka matlab

Result	Matlab
SynthID was detected made or edited with Google AI / OpenAI	AI Partner AI ka nishaan mila → AI se bani ya AI se edit hui
SynthID was not detected unlikely made with AI from a SynthID partner	Partner AI ka nishaan nahi mila. Iska matlab asli NAHI.

4. Kaun pakda jaata hai

- Google: Gemini, Imagen, Veo, Lyria
- Partners: **OpenAI (ChatGPT)**, NVIDIA, Kakao · Apple "jald"

- **180 billion (18,000 crore)+** photos aur videos pe ye nishaan lag chuka hai.

5. Mera test (8 Oct 2026)

Photo	Result
Gemini se bani Diwali family photo	✓ detected · Google AI
ChatGPT se bani kite photo	✓ detected · OpenAI
Mere phone ki asli bike photo	✗ not detected

6. Twist: yaad rakho

Ye sirf un AI tools ki photo pakadti hai jo SynthID nishaan lagate hain. Baaki AI tools ki photo bhi **"not detected"** aayegi, toh **"not detected" asli ka saboot nahi hai.**

Launch ke time 2–3 check ke baad "Something went wrong" aa sakta hai: thodi der ruk ke try karo.

7. "Not detected" aaye toh aur kya karein

1. **Google Lens** se reverse search: photo pehle kahan aayi thi?
2. Bhejne wale se poocho: original kahan se mili?
3. Haath, ungliyan, likha hua text, background ke chehre dhyaan se dekho.
